

## Onboarding Embedded Experience

### Employee engagement begins before day one

Arcoro and Procore are working to close the gap between the field and the back office by hiring the best crews, managing productivity on and off the jobsite, and creating business agility that scales for future growth.

An employee's first impression of your company is critical to set the stage for high employee engagement. The easy-to-use Arcoro<sup>®</sup> Onboarding module simplifies your onboarding process. It's a compliant, cloud-based solution that makes it easy for the company and the employee to efficiently and effectively process new hire paperwork and improve time to productivity. Procore's Embedded Experience solution allows Arcoro to build our software experience within the Procore system.

#### Accelerate Employee Proficiency

Your new-hire can immediately start on whatever you hired them for, because all the paperwork has been completed before their day one.

#### Save Time and Money

Automate manual or paper-based processes to save administrative time and get the employee on the job faster.

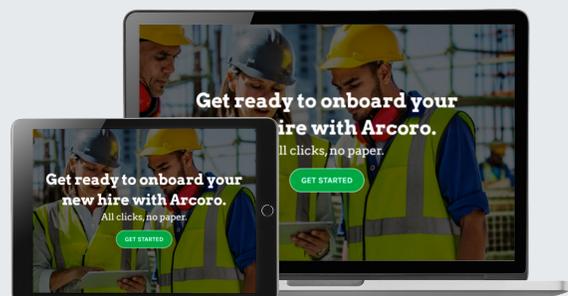

#### Reduce Organizational Risk

Ensure employee data is handled in a consistent and compliant manner. Store all documents on a secure server for easy access and virtual audit reference vs. keeping a paper trail.

#### Onboard from the Field with Kiosk Mode via Procore's Embedded Experience

Use a central workstation or mobile device to onboard groups of new hires or same-day hires from the field or jobsite.
